

TIME FOR BALL CLUB TO TAKE CHANCES

Manager Lee Fohl of Cleveland Indians.

Manager Lee Fohl of the Cleveland Indians has a few pet ideas about managing a ball club that are a little different from the general rule.

"A manager should not send a batter up to the plate with definite orders," says Fohl. "Any time you put a batter under orders you are taking something away from him, for in following instructions he may be forced to let a grand opportunity pass."

"Pitchers should not be worked too hard in the spring training camp. That's when their arms are the weakest, but the custom is to make them do more than twice as much labor then as they will be called upon to perform later on when their arms are strong."

"The time for a ball club to cut loose and take chances is when it's behind. A team on the shot end of the score seems doomed to lose, anyhow, so why not risk something on a chance of making the break come your way?"

TAD JONES FOOTBALL COACH

He is Formally Chosen by Special Committee for Period of Three Years—Sweeney is Adviser.

Official announcement has been made by a special committee from the Yale Athletic association of the unanimous selection of T. A. Jones as head coach of the Yale football team for the next three years. Jones was graduated from the Sheffield Scientific school in 1908. He was varsity quarterback back for three years and in his senior year was captain of the baseball team. For the last few years he has successfully coached the eleven of Phillips-Exeter academy.

Michael Sweeney, now at the Hill school in Pennsylvania, was chosen

Tad Jones.

as general athletic adviser, to serve for 1916 and 1917. The committee did not make public any financial details of either appointment.

Upon motion of Captain Black of the eleven the association voted to appoint the following committee to have full charge of all football matters and to be responsible "only to the athletic association and the university authorities." Vance C. McCormick, '93; S. B. Boroe, '93; John R. Kilpatrick, '11; Joseph R. Swan, '02, and Walter Camp, '80.

May Get a Chance Here.

Tommy Daly as a member of the Cleveland Indians may get a chance to do some regular work, either behind the bat or in the outfield, and may thus show some of his latent ability. With the White Sox he never had a real chance.

SPORTING WORLD

Bill Bernhardt will again umpire in the Southern league this year.

Speaking of amateurs, you can't deny that swimming is still a clean sport.

Howard Camnitz will manage the Ridgeway team in the Class D Interstate league.

Joe Corbett, pitching twenty years ago, is to try a comeback with the Frisco Seals.

It is reported that Dry, the young infielder signed by Connie Mack, is able to soak the ball.

The Jacksonville club of the South Atlantic league has signed a college pitcher named Vander Cammon.

"So the National league is only forty years old," said Hans Wagner. "Well, I always thought I knew more than the league."

Fred Beebe, the veteran major leaguer, cannot get his release from the University of Indiana, where he is coaching.

President Ed Maier of the Vernon Tigers has a proposition to take his ball team to Manila next winter and may accept it.

Otto Knabe expresses surprise that no club has picked up Dave Hickman, a young outfielder turned adrift by the Baltimore Feds.

Having failed to make any sort of a deal for Outfielder Paul Melton, the San Francisco club gave him his unconditional release.

University of Nebraska football team, Missouri valley champions, will play the Oregon Aggies at Portland, Ore., on October 21 next.

The veteran Ralph Works is going to try it again. Announcement from Los Angeles is that he has signed with Frank Chance's Angels.

Jack Compton, the veteran pitcher and former manager of the Dayton Central league team, has been given his unconditional release.

Charley White, the Chicago lightweight boxer, has registered 16 knockouts in his last 32 contests, extending over a period of two years.

Manager Walter McCredie of Portland has decided to give Louis Guistic of St. Mary's college every chance to make good at first base for the Beavers this season.

Joe Pate, left-handed twirler, who joined Wichita, of the Western league near the end of the season last year will again be on the pitching staff of that team this season.

NO CHINESE WALL

Day of Extreme High Protective Tariff Gone.

Statesmen Recognize That We Cannot Flood Other Nations With Goods Without Giving Them an Opportunity to Trade.

Is the Republican party to make itself ridiculous at the national convention in June by declaring for a high protective tariff? The world is moving swiftly to new conditions, and we as a nation are more vitally affected perhaps than most of us realize. All our shipyards on every coast are working at top speed to provide tonnage to replace that lost through the fearful ravages and insatiable demands of war. This tonnage must, and of course will, seek markets left open to us by the present participants in the European struggle. However, all such markets, it should be pointed out and kept in mind, can never be won and kept if the United States is to withdraw within herself and keep behind the old Chinese wall of protection. The logic of the situation is seemingly dawning upon many of our leading bankers who have been prominent supporters of the Republican party, as they see, now that they have been called upon to lend capital to the nations we are seeking to come into closer relations with commercially, that we cannot flood them with our goods unless we give a like opportunity to them. Trade can never be one-sided and be successful.

The protective-tariff theory was doomed before the war broke out, but the war has hastened its demise many years. Special tariffs, "preferential treatment," the securing of "zones of influence," or, more bluntly put, the grabbing of other people's territory by the European rivals and the planting of colonies and spread of the imperialistic idea and of conquest, have sown the seed of international discord, and finally brought about a bursting of all the dams of hate and rage which these things bred and deluged the world with blood. The antithesis is the abolition of all these mischief breeders.—New York Evening Post.

Secretary McAdoo's Plans.

The McAdoo plans contemplate increasing the customs revenues at no point. It proposes to repeal the free-sugar clause, which in the normal course of events would become effective May 1 next, and thus to retain some \$52,000,000 annual income which would be wiped out if this clause were left on the statutes. That this feature will be readily adopted is not seriously to be questioned. It took all the influence that the administration could bring to bear, to adopt the schedule that looked to ultimate free sugar. It will be a good deal easier to repeal that clause than it was to enact it.

But aside from this concession to revenue necessities, the administration proposes to give no recognition to tariff needs. It will stand by the Underwood measure, and ask the country to pay direct taxes instead of indirect ones that mean protection. On this point there will be made up an issue that will not fail to have important bearing on the work of the coming congress and on the presidential campaign of next year.

The treasury plan, it will be observed, does not include any additional imposts on liquors either malt or distilled. Explanation of this is found in the statement from high administration quarters that the last increase of malt liquors was about all the industry was thought able to bear, while the tax on distilled liquors was already so high that to increase it would likely to reduce production and therefore revenue. This, of course, is a purely mathematical calculation, with no consideration for sentiment concerning other than revenue aspects of the question. There will be consideration of those aspects however.

Unwarranted Criticism.

"Mr. Newton D. Baker doesn't know anything about an army, it is said, but he is a good lawyer"—Exchange. A criticism which would have been applied with equal force to Stanton, to Root, to Taft and to every other great secretary of war. Experience has shown that the war department needs a lawyer at its head, and no man has made a complete success as secretary of war who was not a lawyer.

Partisanship Rebuked.

Not since Abraham Lincoln was chosen to sit in the White House has there been a graver crisis than that of the moment.—Tribune. True! and the Tribune is among the newspapers that have put partisanship above patriotism and used whatever petty measure of influence they could command to embarrass the president.—New York World.

Advantage of Free Wool.

The American Woolen company reports that it has developed a valuable export trade to Canada and South America. It is true that this is due in large part to the interference of the war with the industries of Europe, but we are as much entitled to point to it as one of the fruits of the Underwood tariff, as the Republicans are to accuse the Underwood law of responsibility for reduced revenue. We are rather entitled, for no one can doubt that free wool has been of great advantage to our manufacturers.

GOOD ROADS

PRaise FOR AMERICAN ROADS

Compare Very Favorably With Highways of Many European Countries—Much Work in Progress.

"We Americans are prone to overestimate and sometimes to boast of that which we have," says J. M. Linscott, New England agent for a large motor car company. "At least that is the accusation made by our European cousins. I sometimes wonder if it is just. I wonder if we do not more often underestimate our possessions and our achievements. We really are a wonderful country, you know, and with full allowance for our shortcomings, a wonderful people, too. So I rather think we are justified in some of our boastfulness. It is an attribute of youth, and evidence of a good healthy youthful enthusiasm."

"Apropos of what?" you ask.

"Well, of roads, for example."

"We are accustomed to saying that we have the worst roads in the world, and to hold up as an example of model roads the centuries-old highways of Europe."

"I have found in talking with Americans who have toured abroad that most of them will give as examples of model highways a few main traveled roads. But ask them about the general roads of any country and they will either tell you they do not know, or if perchance one has happened to lose his way and got on to one of the byways, he will admit that they are about as bad as has ever been seen in Michigan or Nebraska."

"Your traveled American will expatiate at great length on the wonderful roads of France. And they are wonderful. That is to say, some of them are. At that the total mileage of really good roads in that country is much less than most people imagine. We journeyed over cobblestone roads that would shake your teeth loose—and that in romantic Normandy, too."

"The roads in the British Isles are excellent, but after all New England has more, and they are just as good, despite the climatic conditions that favor the former. The Rhine route in Germany is all that has been claimed for it, but we have our roads up the Hudson to match it—and who shall say whether the scenery on the Rhine or the Hudson is more beautiful, since both are magnificent beyond description?"

"The Texas road is made of crushed sea shells, which make a perfect surface, while the Italian road is composed of powdered marble from the

Good Road in England.

great quarries of Carrara. Anyone who has traveled over this well knows he will not return that way because its beauty is deceptive. The gritty particles of marble will cut the tread off a set of tires in one trip.

"I wonder how many people realize the influence of climate on roads? I wonder how many of those who rave over the fact that the Appian Way is still in tolerable condition after more than two thousand years, have stopped to consider how long that same highway would last in Michigan, for example? The alternate freezing and thawing and heaving would disintegrate and cause it to wear away just as fast as they do our own macadam and cement construction."

"How many of those appreciate how much road-building is going on not only in their own immediate neighborhood but throughout this country."

"How many know that Michigan will build 800 miles of wonderfully good roads; that Indiana will build fully 600 miles of roads, and she already has 1,000 miles of excellent highways, which she is keeping in the pink of condition. Ohio will build fully 140 miles of roads. Some of the eastern Atlantic states—Massachusetts, Maine, New York, Pennsylvania—have thousands of miles of roads that are as fine as anything that lies under the sun. And these states are building more all the time."

Concrete Road Costly.

It costs about \$13,000 to build a mile of good concrete road. This makes a road everlasting, without dust, very few repairs, and good in all kinds of weather.

Stone Houses Are Cheap.

Stone houses last much longer than wood, require no paint, therefore are much cheaper in the end.

Who Is Responsible?

Who is responsible for the bad condition of the roads?

The Change. "Was the fugitive bank officer the cashier?" "He was, but now he's a runner."

HE HAS HAD GRAND CROPS

And Likes the Laws in Western Canada.

"I lived near Lee, Illinois, for 46 years. I came to Saskatchewan in the spring of 1912 and bought land near Briercrest. I have farmed this land, 1680 acres, ever since. I have had grand crops. In 1914 I had 100 acres of wheat that yielded 40 bushels to the acre. I sold this wheat at \$1.50 per bushel. I like the country and my neighbours. My taxes on each quarter section (160 acres) are about \$32 a year. This covers municipal tax, school tax, hail insurance tax—everything. There is no war tax so-called. I like the laws in force here. There is no compulsion to me in any way. I am just as independent here as I was in Illinois, and I feel that my family and I are just as well protected by the laws of the province as we were in our old home in Illinois. What I earn here is my own. I have seven children and they take their places at school, in sports and at all public gatherings the same as the Canadian born."

There is No War Tax So-called.

(Sgt.) M. P. Tysdal. "February 9th, 1916."

We reprint the following article, complete, without comment, from the latest number of the "Saskatchewan Farmer," an agricultural paper published at Moose Jaw, Saskatchewan:

Former Iowa Farmers Are Doing Well in Canada.

"The attempt to check emigration from the United States to our prairie provinces by publishing alarming statements about the enormous war taxes that are being paid here—\$500 on a quarter section yearly—about forcing young men to enlist for the war; about the cold no crops and any old story that by its extravagant boldness might influence men and women from venturing north to Canada, is really in the list of curios to our people. Knowing the country, we can hardly take it seriously. Our governments, however, dominion and provincial, are taking steps to expose the false statements that are being made, and thereby keep the channel open for continuing the stream of settlers that has been flowing to us for the past decade.—Advertisement."

In School. "What are the principal fruits of history?" "I know, teacher; they're dates."

Important to Mothers. Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fletcher*. In Use for Over 30 Years. Children Cry for Fletcher's Castoria

Sure Thing. "Money doesn't bring happiness." "Maybe not. But it will help you greatly in going after it."

Sudden Death

Caused by Disease of the Kidneys

The close connection between the heart and the kidneys is well known nowadays. When kidneys are diseased, arterial tension is increased and the heart functions are attacked. When the kidneys no longer pour forth waste, uric acid poisoning occurs and the person dies, and the cause is often given as heart disease, or disease of brain or lungs.

It is a good insurance against such a risk to send 10 cents for a large trial package of "Azuric"—the latest discovery of Dr. Pierce. When you suffer from backache, frequent or scanty urine, rheumatic pains here or there, or that constant tired, worn-out feeling, get "Azuric" at the druggist. It's 37 times more potent than lithia, dissolves uric acid as hot water does sugar.

To Be Exact. "Do you mean to tell me that you know all the latest dance steps?" "I wouldn't say 'all.' Of course, I don't know what new steps have been invented since I've been standing here chatting with you."

After Grip Then—Spring Fever?

This is the time of year to look out for trouble! We feel weak—our blood seems hot—no appetite.—It's time to clean house! This is when the blood is clogged and we suffer from what is commonly called a cold.

Dr. Pierce's Golden Medical Discovery purifies the blood and entirely eradicates the poisons that breed acid feed disease. Pure blood is essential to good health. The weak, run-down, debilitated condition which so many people experience is commonly the effect of impure blood. "Medical Discovery" not only cleanses the blood of impurities, but increases the activity of the blood-making glands, and enriches the body with pure, rich blood.
